dotshift

Big ideas.
Meet follow-through.

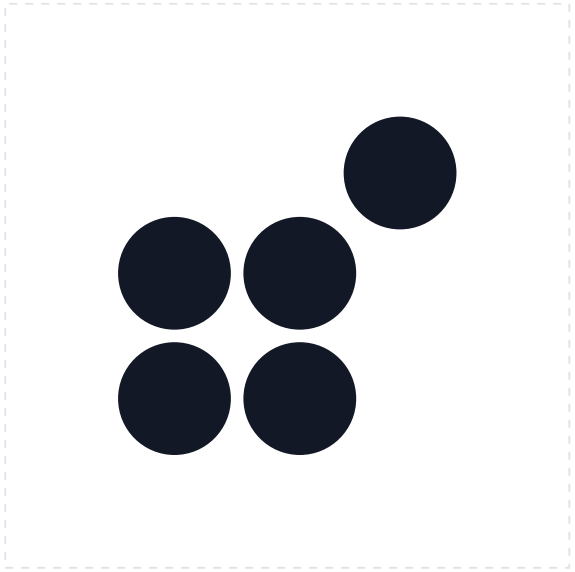

Local coding and review that keeps work moving.

Your machine. Your models. Your branch.

One dot moves forward.

Four steady dots and one deliberate shift. Keep the silhouette consistent everywhere.

FIVE EQUAL CIRCLES

Geometry

64 x 64 unit master. Every circle has a 9-unit radius. Four centers form a 20-unit grid; the fifth sits at (49, 15).

Space and size

Leave at least one dot diameter of clear space around the visible logo. Use the horizontal logo at 144 px wide or larger. Prefer a 24 px mark; use the supplied favicon at 16 px.

Ink first. A little blue.

The primary logo is monochrome. Use the blue offset dot as a secondary signature.

Ink

#131826

Shift blue

#2F54EB

Paper

#F2F4F8

Night

#0E1220

Dark-background accent

#7C98FF

Supporting colors

Slate #4A5266 for secondary text. Line #DFE4EB for dividers. Use Shift blue on light surfaces and the lighter accent on dark surfaces.

Clear, capable, grounded.

Use confident language about work and evidence, with enough warmth to sound human.

Manrope

Aa Bb Cc 0123456789

800 for headlines and the outlined wordmark. 600 for subheads. 400 for body copy. Keep the name lowercase: dotshift.

IBM Plex Mono

Use for commands, status labels, and compact technical details.

Core message

Give dotshift a goal. It codes, runs tests, fixes failures, and gets a fresh review on your machine.

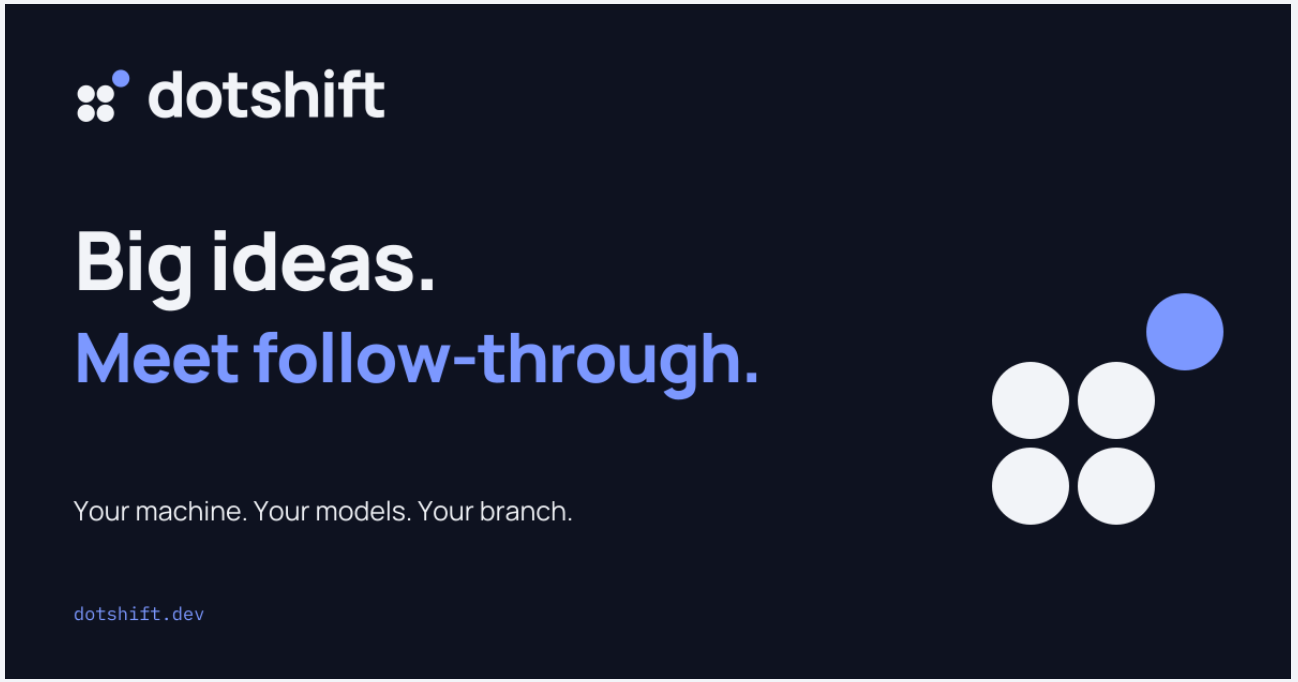

Preferred language

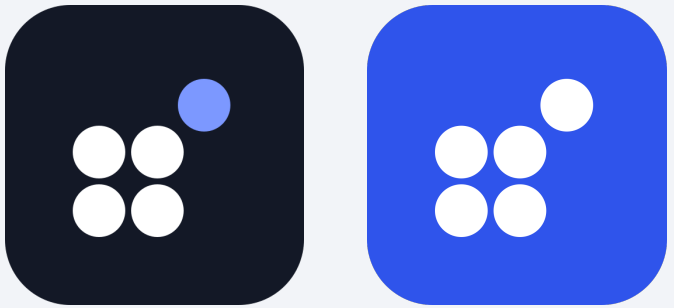

Use concrete verbs: build, test, fix, review. Say what happened and what needs attention. Keep progress messages short.

Avoid claims such as perfect, effortless, or guaranteed. A completed job is supported by tests and review.

Ready to use.

Use SVG for interfaces and print. Use PNG where the destination needs a raster image.

Use the supplied masters

Keep all five dots equal. Keep the offset at the upper right. Never rotate, stretch, add branches, or shrink the fifth dot.
